

Three Horizons of Gambling Harm

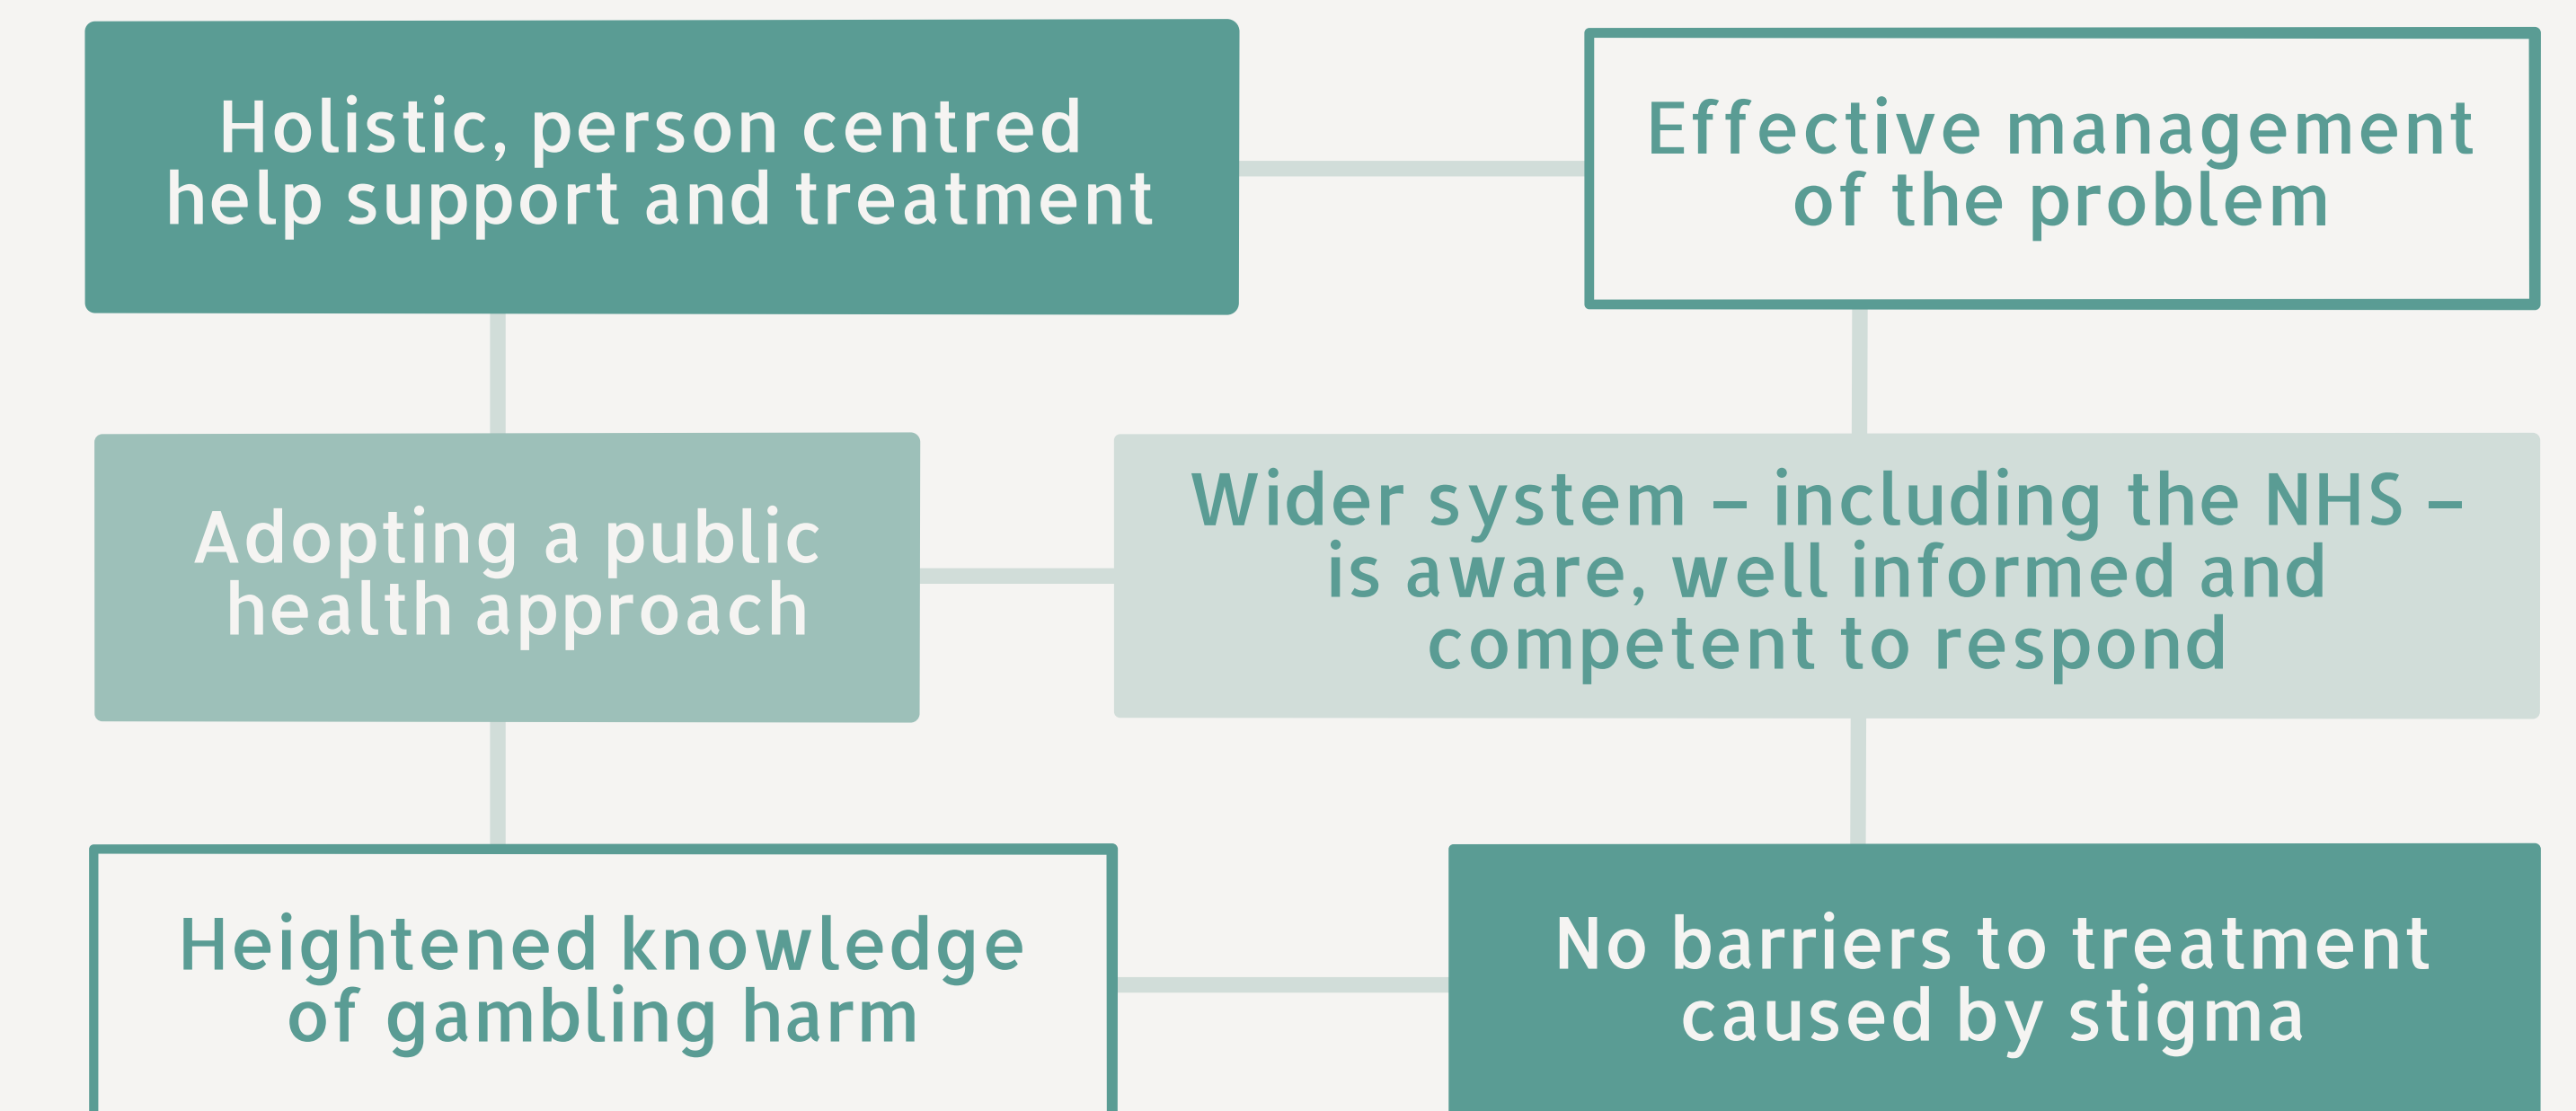

HORIZON 1 Present concerns

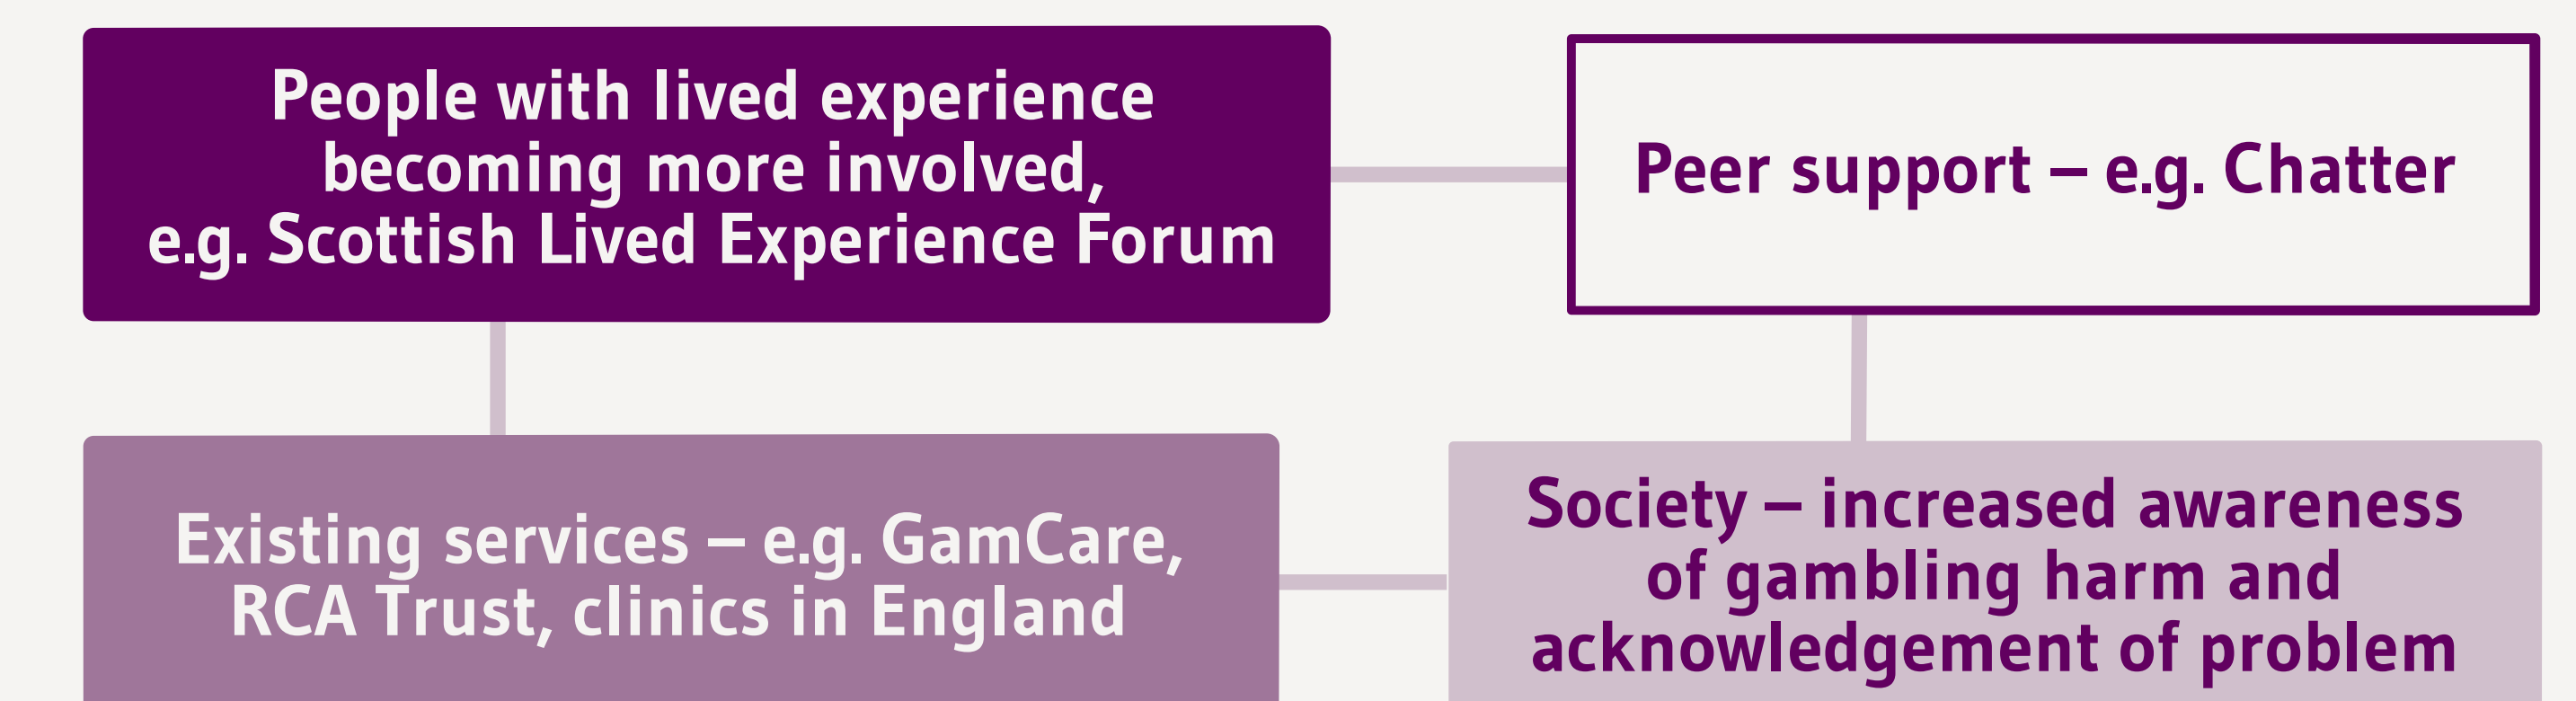

HORIZON 2 Innovation

HORIZON 3 Ideal system

Hope and Encouragement

This map uses a 'Three Horizons' framework to record highlights from a series of conversations with people with lived experience of gambling harms. Three Horizons is a framework for understanding the landscape of change. It shows how the existing 'First Horizon' (H1) system that is not working well slowly gives way to a new 'Third Horizon' (H3) system in the future, through the innovations and changes introduced in the 'Second Horizon' (H2). This framework is used by policymakers to develop a roadmap to plot a course towards a different and better future. This map shows concerns with the present system, elements of an ideal system we would like to see in the future, promising innovations that might help make the difference to shift things from where we are now to where we would like to be, and - crucially - places where that new system is already showing up in the present, providing hope and encouragement that the desired future pattern is indeed possible. This map is an adaptation of one created in November 2020 with the International Futures Forum, based on further engagement and refinement with people with lived experience.
